CIVIC ENGAGEMENT

NEWARK SCHOOL

ACTION

- Civic engagement requires students to take action and to volunteer
- Working towards improving the community which includes our school community

SENSE OF DUTY

- Students feel the need to make a contribution to make the world around them a better place
- Some students feel that they have a sense of duty to make the school safer, more attractive, cleaner, more friendly, more known, producing better results and so on.
- Teachers too contribute in and outside school to make the communities better.

CIVIC SKILLS

- These are skills that are developed and which help students participate in voluntary organisations such as sports, art, music, environment and so on.
- Students learn and develop skills which will help them improve democracy in and outside school
- Students learn about soft skills. They also learn about business, science, art and other subjects. This makes them more knowledgeable and improves their ability to make valid contributions.

SOCIAL COHESION

- This is about the ability to work in a team, to share with others, to make friends, to communicate and so on.
- It requires a sense of reciprocity, trust and bonding with others.

THANKS FOR YOUR ATTENTION

- Feel free to find out more by visiting our website:
